DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-3 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected as failing to define the invention in the manner required by 35 U. S. C. 112, second paragraph. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device.

3. Claim 1 recites the phrase "the relative position and size", "relative" renders the definite scope for distinctly claiming

subject matter. There is insufficient antecedent basis for these limitations in the claim.

The remaining claims, not specifically mentioned, are rejected for incorporating the defects from their respective parent claims by dependency.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. § 102(b) as being anticipated by Grimson et al (U.S. Patent No. 5,531,520). Regarding to claimed invention, Grimson discloses a camera 116, a lens an inherent feature of camera 112, registering sets of three-dimensional image data of object and aligning first coordinate frame with second coordinate frame for generating a matched image data. Grimson discloses a computer and a monitor 118 and 126 as in figure 1 and col.1, lines 60-col. 2, lines 1-3.

Double Patenting

6. Claims 1-3 of this application conflict with claim 1 of Application No. 09/777,962. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

Conclusion

7. All claims are rejected.
